RESEARCH EXPERIENCE

Graduate Student Researcher, Pitt

Summer 2017 – Present

Research Advisor: Prof. Carles Badenes
Topics: Doctoral research in stellar multiplicity in the APOGEE survey using radial velocity, effective gravity, effective temperature, and metallicity measurements. Developed a Monte Carlo script to simulate binary star systems with various parameters.

Undergraduate Student Researcher, Miss. State

Summer 2015

Research Advisor: Prof. Jim Dunne
Topics: Wrote a script in C to evaluate the thermodynamic performance of a heater for the cryogenic hydrogen system of targets at the Thomas Jefferson Accelerator Facility.

Undergraduate Research Assistant, Miss. State

Summer 2013 – Spring 2016

Research Advisor: Jim Gafford
Topics: Managed the Advanced Electronics Laboratory in the Center for Advanced Vehicular Systems. Built prototype circuit boards from copper-coated fiberglass sheets using the lab's milling machine and soldered the boards' components. Tested and studied a Simulink model file for a vehicle's powertrain as part of an externally funded Army project.
