RESEARCH EXPERIENCE

Graduate Student Researcher, Pitt

Summer 2017 – Present

Research Advisor: Prof. Carles Badenes

Topics: Doctoral research on stellar multiplicity using APOGEE radial velocity and stellar parameters. Developed a Monte Carlo script to simulate radial velocity observations of binary star systems to characterize completeness and selection effects in APOGEE targeting strategies.

Undergraduate Student Researcher, Miss. State

Summer 2015

Research Advisor: Prof. Jim Dunne

Topics: Wrote a script in C to evaluate the thermodynamic performance of a heater for the cryogenic hydrogen system of targets at the Thomas Jefferson Accelerator Facility.

Undergraduate Research Assistant, Miss. State

Summer 2013 – Spring 2016

Research Advisor: Jim Gafford

Topics: Managed the Advanced Electronics Laboratory in the Center for Advanced Vehicular Systems. Built prototype circuit boards using the lab's milling machine, soldered the boards' components, and assisted with prototype testing. Completed training in ITAR compliance. Characterized a Simulink model file for a vehicle's powertrain.
